SVS SHREYA

Hyderabad, Telangana, India | +91 7981969169 | venkataseshashreya@gmail.com
linkedin.com/in/svsshreya | github.com/Tirumalashreya

SUMMARY

Fresher AI Engineer (B.Tech CSE, 2025) with hands-on GenAI experience (LLM apps, RAG, tool calling, prompt engineering), multi-agent systems and FastAPI backends. Strong Python and OOP foundation. Open to relocation. Available immediately.

EDUCATION

Stanley College of Engineering and Technology for Women, Hyderabad Completed April 2025
Bachelor of Technology in Computer Science Engineering | CGPA: 8.78 / 10.0

TECHNICAL SKILLS

Languages & Concepts: Python, Java, Object-Oriented Programming (OOP)
Generative AI & LLMs: Generative AI, LLMs (Gemini, Llama3, Groq), Prompt Engineering, Zero-shot / Few-shot Prompting, Tool Calling
AI & Agentic: Agentic AI, RAG Pipelines, LangChain, LangGraph, MCP, Multi-Agent Systems, Google ADK
Data Science & ML: NumPy, Pandas, Scikit-learn, Machine Learning
Web & Backend: FastAPI, ReactJS, HTML, CSS
Databases: SQL, ChromaDB
Tools: Git, GitHub, Ollama, Streamlit, Railway

PROFESSIONAL EXPERIENCE

Tech Mahindra Ltd. | AI Engineering Intern April 2025 - July 2025
Hyderabad, Telangana

Academic Research & Writing Suite (Live Demo)

- Built a multi-agent GenAI pipeline using Google ADK, coordinating Orchestrator, Researcher, Writer, and Editor agents to automate end-to-end research paper generation
- Integrated Researcher agent with arXiv paper discovery and MCP-based tool calling for web fetching; Writer agent used LLM text generation to draft full manuscripts from Abstract to References; Editor agent polished tone and removed AI-pattern phrasing
- Developed FastAPI backend with JWT authentication and SQLite, and a vanilla JS/HTML frontend; deployed live on Railway
- Designed Orchestrator to route user intent across three pipelines - full (topic to paper), write (notes to paper), and edit (draft polish) - using Groq LLMs

MCP Video Insight Hub with Cursor

- Developed a video analysis platform enabling semantic search and question-answering, built using Cursor and MCP
- Implemented transcript extraction, highlights/summarization, analytics, and translation features

Carbynetech | Software Engineering Intern April 2024 - June 2024
Hyderabad, Telangana

- Developed a ReactJS front end for pharmaceutical batch manufacturing with MongoDB integration
- Enabled monitoring of production workflows, batch records, and inventory to improve operational efficiency

PROJECTS

Multi-PDF RAG Debate Bot

- Built a Retrieval-Augmented Generation (RAG) system comparing two research PDFs, using semantic chunking, embedding (all-MiniLM-L6-v2), and ChromaDB vector storage
- Implemented hybrid retrieval combining cosine similarity vector search (top-10) with CrossEncoder reranking (ms-marco-MiniLM-L-6-v2) for top-5 chunks
- Integrated local LLM (Ollama Llama3) for grounded cross-paper comparison and summarization with contradiction detection and confidence scoring
- Added hallucination evaluation using the Gemini API to verify answer groundedness against retrieved context

OPEN SOURCE CONTRIBUTIONS

- **Stock Market Analyzer (PR #12):** Developed an SMA crossover strategy with Plotly visualizations
- **SSOC 2025 - AutoEDA:** Refactored the Null Module (PR #50), added unit tests (PR #97), and built a PCA suite (PR #79); collaborated via Git/GitHub pull requests

HACKATHONS & ACHIEVEMENTS

- **REVA Hackathon:** Shortlisted internationally for 'She Codes' with AR/VR medical applications
- **ACM-W Hackathon (BITS):** Built a machine learning solution for career path guidance
- **CODE-A-THON 2K24:** Advanced to the second round; recognized for problem-solving
- **Music and Arts Website:** Built an interactive site featuring rare instruments, a playable piano, and an instrument quiz

CERTIFICATIONS

- Infosys Springboard - Python Programming
